Event Hub Coolness and You

Harold Pulcher pulcher@pulcher.biz http://pulcher.biz

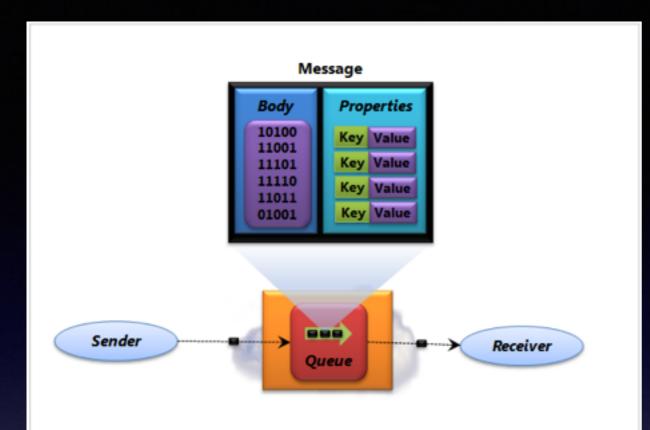

- Need to collect a ton of data
- Need to collect data from a ton of devices
- Need to collect data on my mobile app that is killin' it!
- My new IoT device has to log somewhere.
- I care about the order of things.
- Shipping logs around and merging

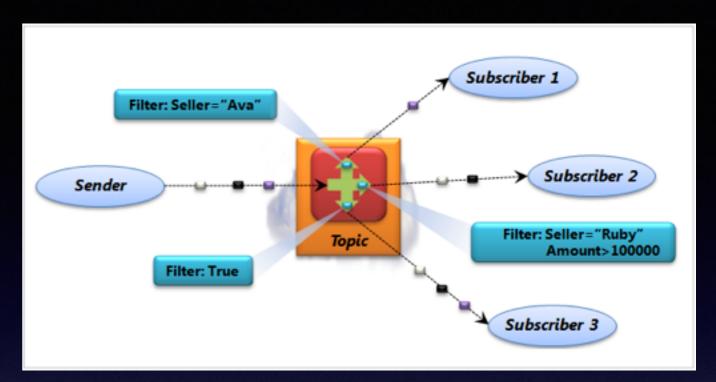

How does this fit?

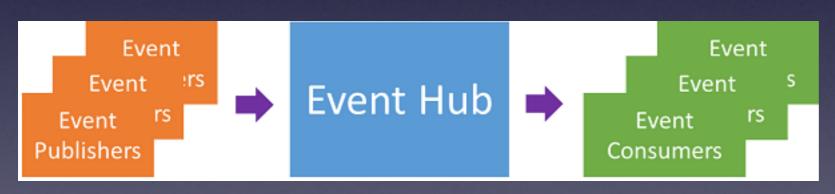

- Part of the Azure Service Bus offering.
- Designed for high speed input/ouput.
- Queues and Topics are too heavy and not really fast enough.
- Based on AMQP and open source standard

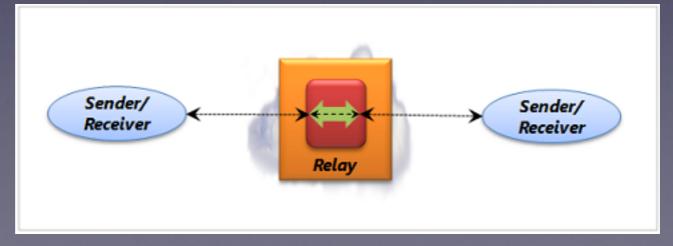

Service Bus

Open standards?

- What is AMQP
- How long has it been around
- Who else uses this stuff?
- What platforms are supported?
- SwiftMQ, a JMS, AMQP 1.0 and AMQP 0.9.1 broker (free and commercial) and a free AMQP 1.0 client.
- Windows Azure Service Bus, Microsoft's cloud-based messaging service
- · Apache Qpid
- Apache ActiveMQ
- Apache Apollo
- RabbitMQ
- IBM MQ Light

Cool, any limits?

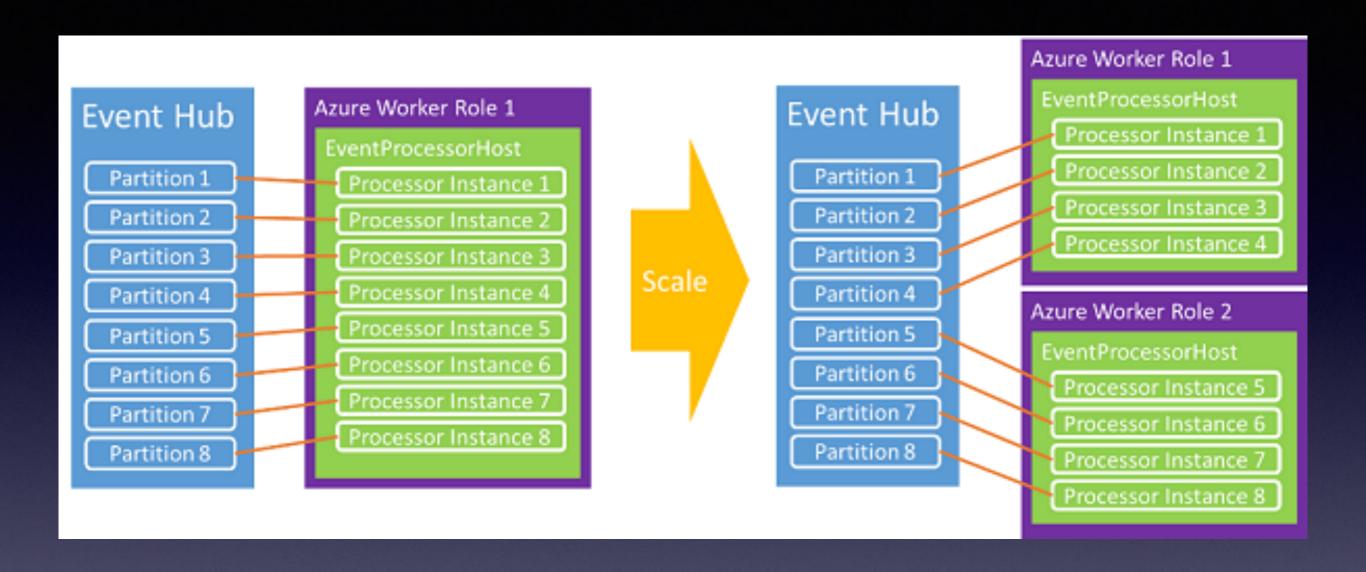

- 1 day retention
- Ingres: 1MBps or a 1000 events per second.
- Egres: 2 MBps
- Maximum size of a single event:
 256KB

Can I get more?

- Single up to 20 units
- A single partition can do 1 unit
- You should not have more units than you have partitions(consumers).

Set it on your config page.

Anything over 20 and you have to call Microsoft

What's a partition?

What's the cost?

	BASIC	STANDARD
Ingress events	\$0.028 per million events	\$0.028 per million events
Throughput unit (1 MB/s ingress, 2MB/s egress)	\$0.015/hr (~\$11/mo)	\$0.03/hr (~\$22/mo)
Publisher policies		✓
Consumer groups	1 - Default	20
Message replay	✓	✓
Maximum throughput units	20	20
Service Bus brokered connections	100 included	1,000 included
Additional Service Bus brokered connections		✓
Message Retention	1 day included	1 day included
Additional storage (up to 7 days)		✓

Monthly price estimates are based on 744 hours of usage. Event Hubs Basic includes 100 Service Bus brokered connections per Service Bus namespace and the

Hey lets //build/something!

Azure Account

Visual Studio 2013 community or better

Creating an Event Hub

- Depends on how many you want reading
- Maximum 32
- How many days to retain
- Don't use the Root, create a reader and writer
- Create a storage account for partition reader coordination. The processor needs this.

Demo Time
